

HITACHI

Reliable solutions

HYDRAULIC EXCAVATOR

Model code: ZX225USLC-6

Engine rated power: 128.4 kW (ISO14396) Operating weight: 24 700 – 28 500 kg Bucket ISO heaped: 0.51 – 1.20 m³

ZX225USLC-6. NO COMPROMISE

The innovative ZX225USLC-6 benefits from unique Hitachi technology, specially developed for Zaxis-6 medium excavators. It delivers a high level of performance, particularly in confined spaces due to its short-tail swing. The spacious cab ensures that no compromises have been made on operator comfort.

Over several decades, Hitachi has built a strong reputation based on high-quality engineering, reliability and durability, and the ZX225USLC-6 shares these qualities. Available with a variety of options, it is suitable for a wide range of industry solutions, thanks to its incredibly versatile features.

6. NEW STANDARDS IN RELIABILITY

8. DURABILITY TO DEPEND ON

10. EXCEPTIONAL VERSATILITY

HITACHI

During the design phase of the Hitachi ZX225USLC-6, engineers at the world's biggest excavator factory addressed the specific needs of the European construction industry. This short-tail swing model has been developed to perfection using market-leading technology to deliver exceptional productivity, particularly in confined spaces, at the lowest possible cost of ownership.

High qualityOnly the best

Only the best design elements and materials.

Incredible versatility

Tilt and rotary tilt modes complete the attachment support system.

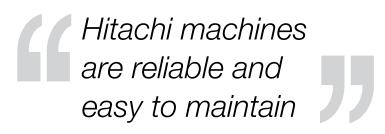

Ultimate durability

Redesigned lower roller reduces risk of damage.

Dan O'Brien, Director, Skyland Drainage Contractors

NEW STANDARDS IN RELIABILITY

Hitachi Zaxis-6 medium excavators raise the bar for reliability, because they are designed to work seamlessly and without complications on a wide range of demanding job sites. With high levels of availability and performance, exceptional efficiency, and a variety of easy maintenance features, the ZX225USLC-6 contributes to a profitable return on investment.

Easy maintenance

Several components including filters, water separator and the urea tank are conveniently located to provide quick and easy access for daily checks and replacement when required.

Durable hydraulic connection

A rubber hose fitted with a flange has been incorporated into the design of the hydraulic return pipes. These enhance the reliability of the system and reduce the risk of oil leaks.

User-friendly fuel filter

The main fuel filter screws into place on the ZX225USLC-6. This makes it easier to replace and ensures that dust is prevented from entering the fuel circuit during routine maintenance procedures.

More efficient cooling

The expansion tank is mounted on top of the engine's cooling system. This revised position means that the air can be completely removed and prevents the engine parts from overheating.

Long-lasting components

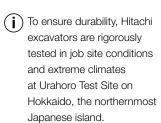

The cooling system of the ZX225USLC-6 incorporates aluminium components, including radiator, air condenser and fuel cooler. This improves resistance against corrosion and enhances the machine's durability.

Conveniently located inspection points.

DURABILITY TO DEPEND ON

The Zaxis-6 medium excavator range has been built using decades of manufacturing experience. Each model is designed and engineered to operate in the most challenging environments, and lives up to the Hitachi reputation for producing highly reliable and durable machines.

Reinforced for safer working environment.

Durable design

The lower roller of the ZX225USLC-6 has been redesigned to prevent mud from entering and causing damage to the oil seal. This enhances the long-term durability of the machine.

Enhanced fuel circuit

A high performance water separator and cold fuel resistance valve are integrated into the pre-filter for added protection against moisture. In addition, a large capacity electric fuel pump supplies an appropriate amount of fuel to the engine for an improved performance.

Engine protection

The combustion chamber is made from stronger materials and the revised shape of the piston is designed to achieve cleaner emissions. These features will further enhance the reliability of the engine.

Oil leak prevention

The O-rings on the control valve and swing motor are made from fluorine. This highly durable material withstands high oil temperatures and reinforces the parts' reliability to prevent oil leaks.

Strong undercarriage

A large and strong X-frame reinforces the undercarriage of the ZX225USLC-6. This helps to reduce the likelihood of damage and enhances the machine's reliability.

Jocke Bjorkman, operator, Steffes Schakt

EXCEPTIONAL VERSATILITY

The ZX225USLC-6 is one of the most versatile Hitachi medium excavators, thanks to its short-tail swing and a variety of optional extras. It is suitable for urban job sites, including road construction and demolition, as well as forestry, and particularly if space is limited. Smooth, fast and precise, it delivers high levels of productivity and fuel efficiency.

Greater flexibility

The rotary tilt and tilt modes are included within the attachment support system on the ZX225USLC-6. These and nine other modes can be registered on the monitor for the easy fitment of attachments to increase versatility.

Power boost

The tried-and-tested power-boost feature has 10% more capacity than the Zaxis-3 model. This increases the capacity of the ZX225USLC-6 to deliver an enhanced level of performance and lifting power.

Compact and powerful

The short-tail swing of the ZX225USLC-6 enables it to fit into confined spaces, which makes it suitable for a wider variety of job

sites than the standard 21-tonne model. Its compact dimensions are combined with a powerful lifting force and good stability.

Better visibility

There are fewer bars on the optional front guard and those remaining are reduced in size – yet retain their rigidity. This helps to minimise any blind spots and improves the operator's visibility.

Machine performance

The ZX225USLC-6 is equipped with two extraspools in the control valve. This increases versatility by making it easier to install attachments that require multiple, large volumes of oil and on two-piece boom models.

Two tilt modes add to the versatility of the ZX225USLC-6.

OUTSTANDING QUALITY

Owners of Zaxis-6 medium excavators are reminded of the quality of their machine whenever they climb in the cab and turn the key. Materials of the highest quality have been used throughout the ZX225USLC-6, and its performance, reliability and safety are testament to the relentless pursuit of quality at Hitachi's Tsuchiura Works factory.

Ergonomic controls contribute to the ultimate workspace.

Superior cooling performance

The upper structure benefits from highquality sealant (around the cooling package) and acoustic materials to eliminate any deterioration caused by heat. These ensure the long-term cooling and low-noise acoustic performance of the ZX225USLC-6.

Excellent weather resistance

The cab console has been sculpted in highly durable AES-grade resin. This ensures superior weather resistance and ultimately prevents the sun's ultraviolet rays from damaging the console.

Reduced emissions

Hitachi has developed a selective catalytic reduction (SCR) system that injects urea into exhaust gas to reduce nitrogen

oxide from emissions. This cutting-edge technology not only helps the environment, but also complies with EU Stage IV emission regulations.

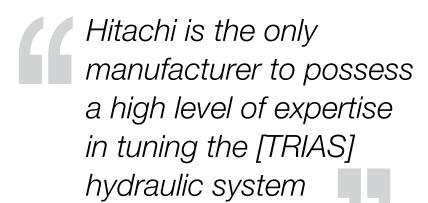

Ultimate in comfort

A fully adjustable seat, spacious cab, ergonomic controls and advanced music system all contribute to the ultimate working environment.

Safety at work

The ZX225USLC-6 has been fitted with a high-spec rollover protective structure-compliant (ROPS) and centre pillar reinforced structure (CRES V) cab. The pressurised cab is designed to protect the operator from the penetration of dust and potential job site risks.

Burkhard Janssen, General Manager Product Management & Engineering, Hitachi Construction Machinery (Europe) NV

STRENGTH IN TECHNOLOGY

Unique Hitachi technology is incorporated within the Zaxis-6 medium excavator range to meet the ever-changing needs of customers in the construction industry. The ZX225USLC-6 has been designed with several features that help to maximise its efficiency, enhance the operator's experience and improve its overall performance.

Saving fuel and costs

Hydraulic loss is decreased by TRIAS II technology. It reduces the hydraulic oil returned to the tank due to the cooperative control of the pump and valve. This helps to lower fuel consumption by 8% in ECO mode with the same productivity.

User-friendly functionality

A large seven-inch multi-function LCD monitor provides a wide range of useful technical information. With multi-lingual support in up to 32 languages, it enables operators to check the machine's status and settings at a glance.

Remote monitoring

Global e-Service allows owners to monitor their fleets remotely via Owner's Site (24/7 online access) and ConSite (an automatic monthly report). These help to maximise efficiency, minimise downtime and improve overall performance.

Fewer emissions

The after-treatment device consists of a diesel oxidation catalyst (DOC), urea mixing pipe, SCR system and silencer. This advanced technology helps to reduce emissions and noise levels.

Advanced audio system

The AM/FM radio is accessible from the monitor and an auxiliary socket – for devices such as MP3 players – is linked to the sound system. This choice of entertainment helps to provide an enjoyable – and productive – working environment.

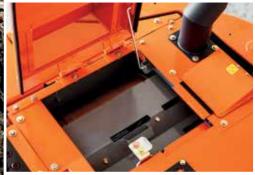

8% lower fuel consumption in ECO mode with TRIAS II.

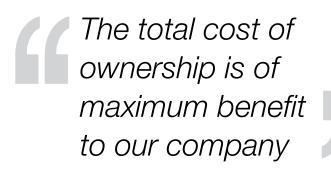

The LCD monitor shows the machine's status and settings.

The SCR system reduces emissions and noise levels.

Peter Kögel, Member of the Management Board, Kögel Bau GmbH & Co. KG

REDUCING THE TOTAL COST OF OWNERSHIP

Hitachi has created the Support Chain after-sales programme to ensure optimum efficiency, as well as minimal downtime, reduced running costs and high resale values.

Global e-Service

Hitachi has developed two remote monitoring systems as part of its Global e-Service online application. Owner's Site and ConSite are an integral part of the excavator, which sends operational data daily via GPRS or satellite to www.globaleservice.com. This allows immediate access to the Owner's Site, and the vital information that is required for support on job sites.

Comparing the ratio of operating and non-operating hours helps to enhance efficiency. Effective management of maintenance programmes helps to maximise availability. Running costs can also be managed by analysing the fuel consumption. The location and movements of each machine are clearly displayed for essential planning.

An automatic service report – ConSite – sends a monthly email summarising the information from Global e-Service for each machine. This includes: daily working hours and fuel consumption data; statistics on the operating mode ratio, plus a comparison for fuel consumption/efficiency, and CO₂ emissions.

Technical support

Each Hitachi service technician receives full technical training from HCME in Amsterdam. These sessions provide access to the same technical knowledge available within the Hitachi quality assurance departments and design centres. Technicians combine this global expertise with the local language and culture of the customer to provide the highest level of after-sales support.

Extended warranty and service contracts

Every new Hitachi Zaxis-6 model is covered by a full manufacturer's warranty. For

extra protection – due to severe working conditions or to minimise equipment repair costs – Hitachi dealers offer a unique extended warranty called HELP (Hitachi Extended Life Program) and comprehensive service contracts. These can help to optimise the performance of each machine, reduce downtime and ensure higher resale values.

Parts

Hitachi offers a wide range and a high availability of parts dispatched from the

 $53,000 \, \text{m}^2$ HCME European Parts Depot in The Netherlands.

- Hitachi Genuine Parts: allow machines to work for longer, with lower running and maintenance costs.
- Hitachi Select Parts and 2Genuine Parts: especially for older machines, they cost less, are of proven quality and come with the manufacturer's warranty.
- Performance Parts: to cope with highly demanding conditions, they have been engineered for greater durability, better performance or longer life.
- Remanufactured components: offering an economically viable solution, they are the best option when preventative replacements are required.

Whatever the choice, the renowned quality of Hitachi construction machinery is assured.

Yuichi Tsujimoto, HCM President

BUILDING A BETTER FUTURE

Established in 1910, Hitachi, Ltd. was built upon a founding philosophy of making a positive contribution to society through technology. This is still the inspiration behind the Hitachi group's reliable solutions that answer today's challenges and help to create a better world.

Hitachi, Ltd. is now one of the world's largest corporations, with a vast range of innovative products and services. These have been created to challenge convention, improve social infrastructure and contribute to a sustainable society.

Mini excavators

Hitachi Construction Machinery Co., Ltd. (HCM) was founded in 1970 as a subsidiary of Hitachi, Ltd. and has become one of the world's largest construction equipment suppliers. A pioneer in producing hydraulic excavators, HCM also manufactures wheel loaders, rigid dump trucks, crawler cranes and special application machines at state-of-the-art facilities across the globe.

Incorporating advanced technology, Hitachi construction machinery has a reputation for the highest quality standards. Suitable for a wide range of industries, it is always

hard at work around the world – helping to create infrastructure for a safe and comfortable way of living, developing natural resources and supporting disaster relief efforts.

Hitachi Zaxis excavators are renowned for being reliable, durable and versatile – capable of delivering the highest levels of productivity under the most challenging of conditions. They are designed to provide owners with a reduced total cost of ownership, and operators with the ultimate level of comfort and safety.
