The ZX48U-6 has been designed to enhance productivity on a variety of job sites, including utilities, foundation work, landscaping, and indoor demolition and construction. Equipped with a powerful Stage V-compliant engine and muffler filter after-treatment device, it benefits from reduced fuel costs and emissions. Also suitable for rental projects, the ZX48U-6 is easy to operate and maintain, and offers an exceptionally comfortable working environment.

**Improved performance**  
The long blade enhances efficiency.

## Short-tail swing radius

The short-tail swing radius of the ZX48U-6 is ideal for confined spaces.

**Ultimate comfort**

The spacious cab has a wide operator seat, adjustable arm rest and is easy to access.

**Enhanced durability**

LED lights on the cab and boom last longer than halogen alternatives.

**Easy maintenance**

Components are easily accessible.

**Smooth operation**

The auxiliary function lever ensures excellent control of attachments.

# Enhanced performance

Thanks to the short-tail swing radius of the ZX48U-6, it is the perfect fit for urban job sites where space is often limited. Fast, powerful and fuel-efficient, it will ensure high levels of productivity, and performs with lower levels of fuel consumption and fewer emissions than previous models.

## Efficient productivity

The ZX48U-6 delivers high levels of productivity on the job site thanks to a powerful Stage V-compliant engine, quick cycle time and an efficient hydraulic system. The EGR and muffler filter reduce NOx and particulate matter, and a common rail system helps the engine to run optimally. This not only reduces emissions, but also contributes to greater fuel efficiency and reduced running costs.

## Built to last

Durable features of the ZX48U-6 – such as strengthened front joints, improved swing post and boom cylinder guard – ensure a reliable performance, helping you to get the job done on time and on budget.

## Lower fuel costs

The advanced energy-saving system combines ECO mode, auto idle and isochronous control features to significantly reduce fuel consumption. It also reduces noise levels and emissions.

Durable features contribute to a reliable performance.

Quick cycle time and efficient hydraulics ensure high productivity.

Multifunctional LCD monitor shows data at a glance.

A clear view from the cab.

LED lights have a longer lifetime than halogen alternatives.

# Exceptional comfort

The spacious, air-conditioned cab of the ZX48U-6 has been designed to make the operator feel at ease during the working day. It offers excellent visibility of the job site, and several user-friendly features to ensure easy and safe operation.

## Spacious cab

The ROPS-compliant cab of the ZX48U-6 is spacious and easy to access via the entrance step. Fitted with a wide and adjustable sliding suspension seat, folding foot pedals and adjustable arm rest, the ZX48U-6 provides a high level of comfort for operators.

## Easy operation

User-friendly controls are in easy reach of the operator and the hydraulic pilot control levers ensure a smooth operation. The blade is 90mm longer than on the previous model, and the distance between the tip of the bucket and blade is now shorter, which means more material can be gathered and less remains for the operator to clear manually.

## Enhanced design

The ZX48U-6 is equipped with new LED lights, which have a longer lifetime than halogen alternatives for efficient energy use. Options include a sun visor on the front window and an auxiliary function lever with proportional switch for easy control of the front attachment.

Controls are within easy reach.

# Easy to maintain

Routine maintenance and servicing of the ZX48U-6 can be carried out with minimum effort, resulting in maximum uptime. Components are accessible for inspection and are designed to be easily cleaned, ensuring an optimum performance.

## Convenient access

The engine and radiator covers have been designed to allow easy access. Sufficient space around the fuel tank opening makes the new mini excavator easier to refuel. The battery is positioned on the same side as the radiator for easy maintenance.

## Quick cleaning

The undercarriage is easy to clean due to the soil-free truck structure from which accumulated mud and sand can be easily removed. Dozer blade openings help to minimise the build-up of dirt and make it quicker to remove.

## Safety first

The battery disconnect switch is now available as standard for safer and easier maintenance.

The battery disconnect switch allows maintenance to be carried out safely.

Easy to open covers provide quick access.

The tilting floor enables easy access to the engine and control valve for quick servicing.

# MACHINE CAPACITIES

- Notes: 1. Ratings are based on ISO 10567.  
 2. Lifting capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.  
 3. The load point is the center-line of the bucket pivot mounting pin on the arm.  
 4. \*Indicates load limited by hydraulic capacity.  
 5. 0 m = Ground.

A: Load radius  
 B: Load point height  
 C: Lifting capacity

To determine lifting capacities, apply "Rating over-side or 360 degrees" machine capacities from table with "Blade above Ground" and deduct weight of installed attachment and quick hitch.
